More customers. Less downtime.

NOVO

OUR STORY

Five months ago, I bought my first car.
Still learning the realities of the road.

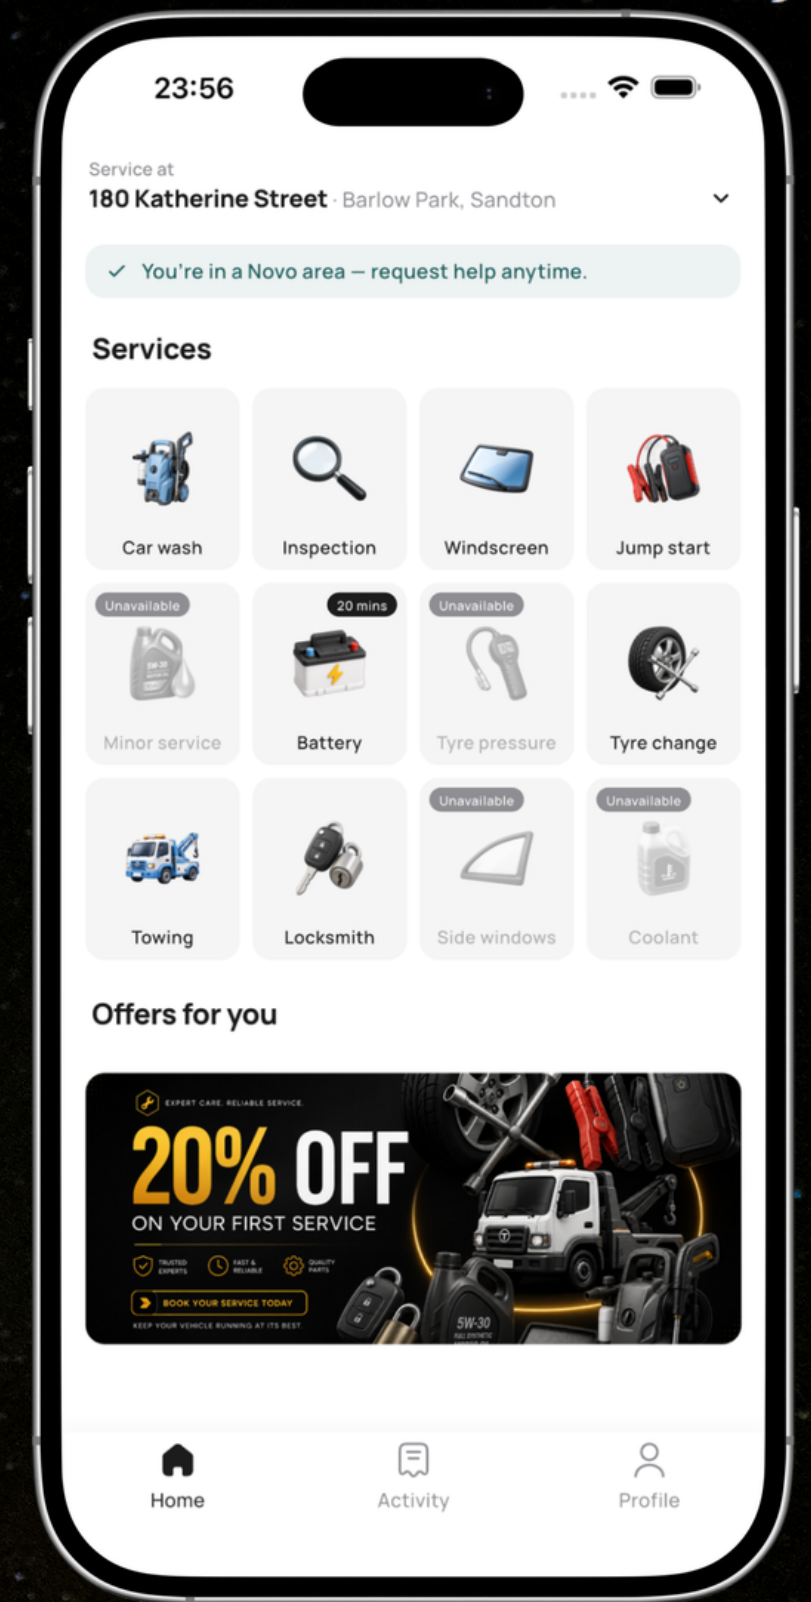

One night in Midrand — a pothole.
On the way home to Sandton.
Tyre gone.

Nearby workshops were hard to find.
Most didn't answer.

One person answered.
Couldn't come — couldn't verify me as a real customer.

I drove home on a damaged wheel.
The repair cost far more — wheels replaced and aligned.

**"Why is it still so difficult to get trusted
automotive help when you actually need it?"**
